

ROADMAP

Exchanges

Listing on Multiple Exchange platforms

Website upgrade

To upgrade and tuning our web framework and publication workflows to improve sustainability, facilitate future maintenance, and establish a baseline for future development

Atomic Cross-Chain Trading

Lightning Network activation to allows users to cross-trade different crypto currencies without relying on centralized parties

Promotions

Increase presence and penetration of mainstream media through both advertising & public relations

Team Expansion Mobile Wallets

As the community continues to grow, we will have had to scale up our team size to match the community size.

Development of Android , Electrum and Ios Wallet

Market Maker (AI bot) Governance & Proposals System

We will dedicate 20% of our ICO to constantly running a market maker (AI bot) on major exchanges

Introducing a better way to building a better governed internet of the people, this will enable our community to democratically shape the future
